

Connect & Empower

COMPANY PROFILE

JIJI TELCO UGANDA LIMITED

JJI Telco Uganda Limited is a Ugandan based company focused on providing comprehensive Civil engineering Works; Building & construction solutions, Water & Sewerage systems, Electrical & Renewable Energy solutions and Telecommunications infrastructure.

Utilizing its network of experts and technicians spanning across the country, JJI Telco has strategically positioned itself to offer innovative, cost effective solutions to its clientele with the promise of efficiency and reliability. Furthermore, the company is committed to extending its operations across the African continent, aiming for widespread expansion.

• OUR MISSION

Our mission is to provide all round construction solutions efficiently, reliably and cost effectively, in a safe and environmentally friendly manner to our clients by leveraging on technology, creativity, and highly skilled and professional technical personnel.

OUR VISION •

To be the leading brand in provision of all round civil engineering and construction solutions

Our Core Values

INTEGRITY

We ascribe to total honesty, transparency and accountability.

PROFESSIONALISM

We adhere to professionalism and the highest standard in everything we do.

TEAMWORK

We believe in team synergy and we therefore strive to foster collaboration & co-operation in our internal and external relationships.

SAFETY

We prioritize safety and implement strict safety precautions in our work environments.

CREATIVITY & INNOVATION

We strive to continuously develop more efficient and effective ways to deliver projects by creating a working environment that promotes creativity and innovation.

Our Main services include:

- **TELECOMMUNICATIONS INFRASTRUCTURE; Fibre Optics services, GSM Services**
- **CIVIL ENGINEERING WORKS; Building & Construction, Road Works, Water & Sewerage,**
- **ELECTRICAL & RENEWABLE ENERGY SOLUTIONS; Solar energy works**

We strictly oversee service provision, guaranteeing that clients receive optimal value for their investment.

This entails close supervision, training, and continual technical assistance provided to our teams.

We highly regard client evaluations and feedback, incorporating them into our project implementation procedures as Standard practice.

Our technical leads are deeply involved in every aspect of the projects to showcase our dedication and commitment to quality management and to exemplify our policy of delivering a service of the highest professional caliber. We have also made investments in the correct equipment and machinery to ensure efficient performance by our technicians.

Telecommunication Infrastructure

GSM Turnkey Telecommunications Solutions:

JJI Telco offers complete Telecoms infrastructure solutions to our clients, including site survey and planning, site acquisition, project management, site design and construction, site commissioning and maintenance services as well as securing of relevant regulatory and county permits for the (BTS) Base Transceiver Station.

Our expertise, experience and efficiency has enabled us grow and work with leading telecommunication companies and service providers including ZTE, Airtel, Huawei, American Towers.

Our technicians are highly experienced and skilled in this field and benefit from trainings and technical support from our lead engineers to ensure they deliver on the projects.

Fibre-Optics Services:

JJI Telco has unique expertise and experience in laying of fibre optic cables gained from key players in the telecommunication sector, such as CAMUSAT, HUAWEI, CHINA COMSERVE, AIRTEL etc.

Our scope of works covers the areas below:

1. Planning, survey and Design
2. Civil Works
3. Optical fibre cable laying
4. Optical fibre cable splicing
5. Structural cabling in big buildings
6. Optical fibre network maintenance

Our highly experienced technical teams have the right expertise to effectively and efficiently undertake the fiber works listed under our service portfolio.

Civil Engineering Works

Our Services in civil engineering encompasses a comprehensive range of tasks involved in the planning, design, construction, and maintenance of infrastructure projects.

This includes Preliminary studies and Feasibility assessments, Detailed engineering design, Construction management, site preparation & earthworks, Structural Engineering, Water resources & Environmental Engineering, Geotechnical assessments and Project Management Consultancy.

Electrical & Renewable Energy Solutions

We firmly believe in the essential role that electrical and renewable energy technologies play in shaping the future of sustainable energy systems globally. We view renewable energy as a fundamental solution that leads the transition to a cleaner, greener energy and environmentally friendly world.

Our scope of work encompasses various tasks and responsibilities such as :

- **Designing and Installing Solar Photovoltaic Systems,**
- **Maintaining and Troubleshooting Solar Pv Systems,**
- **Integrating Energy Storage Solutions,**
- **Implementing Grid-Tied and Off-Grid Solar Systems,**
- **Retrofitting Buildings with Energy-Efficient Lighting,**
- **Installing Electric Vehicle Charging Stations,**
- **Incorporating Smart Grid Technologies**

Environment Health and Safety (EHS)

We are sensitive to matters of health, safety and environmental preservation and management. We adhere to the global EHS policies to ensure that a safe occupational working environment is created for excellent service delivery.

Our policy is based on the following guidelines:

Management Commitment:

All levels of our management are committed and accountable for implementing, maintaining, monitoring and assessing the EHS programs of our company.

Responsibility:

Our site supervisors and foremen are responsible and accountable for implementation of EHS programs on site.

Commitment to Safe Environment:

JJI Telco strives to continuously provide and promote a safe and healthy work environment for our employees and the public.

Pollution Management:

We strive to reduce all forms of environmental pollutions through sound work practices, in compliance with all applicable EHS standards.

Compliance Enforcement:

Compliance with EHS standards is a key ingredient in the training, performance, review and incentives of all employees.

Join *our* Team

JJI Telco boasts a proficient team of adept and seasoned professionals and technicians who possess adaptability, enthusiasm, diversity, and a keen willingness to learn. They're adept at providing inventive solutions to our clients.

We are dedicated to ensuring that the most suitable individuals are placed in appropriate roles within the organization, equipped with the necessary training and resources for success.

Our team's conduct mirrors our steadfast commitment to diversity, acknowledging that all backgrounds and skill sets are valued at JJI Telco .
